

HIMANSHU SHARMA

Pune, India | +916352559089 | himanshu15101998@gmail.com

Personal Summary

Experienced Web Developer with 4 years of success in building advanced web applications. Proficient in **JavaScript, TypeScript, React.js, Node.js, and Redux**, with a strong ability to learn and adapt to new technologies.

Experience

Full Stack Developer

12/2024 to 07/2025

Space-o InfoWeb Pvt. Ltd.

Ahemdabad

- Built a recommendation system using **React.js**, **NestJS**, and **pgvector**, processing product data from CSV files. Generated and stored vector embeddings for efficient similarity search, enabling accurate product recommendations based on user queries.
- Designed and developed an **admin dashboard** for a food ordering app, enabling order management, user analytics, and operational oversight.

Full Stack Software Developer

02/2024 to 12/2024

SyncSignature

Surat

- Led the development across the entire stack, managing both frontend and backend services, and overseeing deployment on AWS infrastructure.
- Developed front-end components using React.js, integrated with ShadCN UI, and styled with Tailwind CSS for a seamless user interface.
- Created scalable backend services using Node.js and GraphQL, enhancing API performance and user experience.
- Developed a workspace module, allowing multi-user collaboration. Managed email signature deployment using Google APIs.
- Implemented an AI image generation feature via third-party APIs. Managed AWS SES for email functionalities.
- PWA Implementation:** Converted the email signature management platform into a Progressive Web App (PWA) using **Workbox** and **service workers**, enabling offline access, push notifications, and improved performance metrics (e.g., reduced load time by 30%).
- Integrated a Web App Manifest for native-like installation and home screen accessibility.

Web Developer

10/2021 to 01/2024

Ciphernutz IT Services

Surat, India

- Key Technologies Used: React.js, Angular, Next.js, SCSS, WebSocket, Strapi, and Sanity.
- Developed a web app for managing tax documents using React.js, SCSS, and WebSocket for real-time updates.
- Built an onboarding process for a loan service app using React.js, Tailwind CSS, and Typescript.
- Contributed to a tech networking platform by enabling job discovery and resource sharing with Next.js.
- Integrated CMS platforms like Sanity and Strapi for enhanced content delivery.

Skills

- React.Js competence
- Angular
- Responsive design insight
- Command line usage
- Agile methodologies understanding
- PWA**
- API integration capability
- User experience principles
- JavaScript proficiency
- Package managers: npm, bower
- Version control experience
- Cross-Browser compatibility
- Material-UI utilisation
- CSS3 proficiency
- Node.Js understanding
- Bootstrap knowledge
- TypeScript fundamentals
