WORK EXPERIENCE

Web Developer

Ciphernutz IT Services

10/2021 - 01/2024

Achievements/Tasks

- Developed a web app using React.js, Reactstrap, SCSS, and WebSocket specifically for tax management of companies. This tool enables clients (compaines) to upload their documents for review by the Admin Team to determine eligibility for government scheme benefits. Additionally, partners (another role) can refer clients through this platform.
- Established a mono repository with Yarn workspace in Next.js, showcasing proficiency in optimizing project structure and dependencies for streamlined development and maintenance.
- Build an onboarding process for a loan service app using React.js , Tailwind CSS and Typescript.
- Contributed to the development of a tech networking platform using Next.js, enabling job discovery, company exploration, and community engagement within the tech industry. Developed key features facilitating networking, job search, and resource sharing.
- Developed various APIs in Node.js with Express.js for handling data stored in a MongoDB database.
- Leveraged headless Content Management Systems (CMS) such as Sanity and Strapi to enhance content delivery and management.
- Implemented the axios-cache-adapter mechanism, resulting in a notable enhancement of performance gains ranging from 20% to 80%.

PERSONAL PROJECTS

Wordle (web-based game)

- Designed and implemented a web-based Wordle game, showcasing proficiency in the MERN stack (MongoDB, Express.js, React.js, Node.js)
- App link: <https://wordle-ruby.vercel.app/>
- Github Backend: <https://github.com/Himsharma-code/wordle-backend>
- GitHub Frontend: <https://github.com/Himsharma-code/wordle>
- I authored a Medium article addressing the challenges encountered during project deployment. [Link to article](#)

Challenge management system

- Build a web application which lets employees of an organisation to add/manage challenges for internal hackathons which they organise every month.
- Build using Nextjs, MongoDB, Tailwind CSS, NextUI and typescript.
- Github Link: <https://github.com/Himsharma-code/hack-ideas-app>

Project Name

EDUCATION

Bachelor's of Engineering

Government Engineering College (GEC) Bharuch

08/2016 - 08/2020

C.G.P.I -7.41

Courses

- Electrical Engineering

SKILLS

React.js Next.js JavaScript
TypeScript Version Control/Git
Redux ReactStrap Chakra UI
Strapi Sanity Bootstrap Jest
MUI Stitches HTML CSS
SCSS Tailwind CSS Node.js
MongoDB Docker
Responsive Design

CERTIFICATES

The Complete Web Development Bootcamp by Dr. Angela Yu

The Complete JavaScript Course : From Zero to Expert! by Jonas Schmedtmann

Node.js, Express, MongoDB & More: The Complete Bootcamp by Jonas Schmedtmann (11/2023 - 12 / 2023)
